## Community guidelines

March 2024

*NatPower UK aims to foster a culture of inclusion and respectful discussion on our social media pages. To uphold this, our pages are moderated by our team to ensure that interactions are in line with our following community guidelines.*

### What we encourage

- **Diverse perspectives:** Everyone's experience and background contribute to enriching our discussions, and we encourage you to share these experiences respectfully.
- **Learning and sharing:** Ask questions, share your expertise, and engage in thoughtful conversations that contribute to the collective learning of the community.
- **Positive engagement:** Let's keep discussion friendly, constructive, and supportive.

### What we don't accept

- **Disrespectful content:** Treat others online with kindness and respect, even when you disagree. Harassment, hate speech, offensive language, personal attacks, and bullying will not be tolerated.
- **False information or fake news:** When making claims, ensure they are backed up by robust evidence and research.

Please note: if any person engaging with NatPower UK's social media content does not adhere to the above guidelines, NatPower UK exercises the right to hide their content from public view.
